

Choose AMBlue II & mold doesn't stand a chance.

The distinctive blue interior core and outer jacket of **JPL antimicrobial flex ductwork** stands out, but it's the Agion® natural silver technology that protects homeowners from dangerous mold and other contaminants. When looking to create a healthy and pure Indoor Air environment, don't overlook the duct system that distributes the air you breath. Choose the first flexible ductwork introduced that was specifically designed and engineered to resist microbial growth in the inner core of your ductwork. Choose JPL's AMBlue!

JPL knows the value of a good reputation and strives to provide service and quality of the highest level. JPL's antimicrobial flex ductwork is more than its distinctive blue interior and outer jacket – it's the best in the business.
